Medical Lymphatic Therapy

The massage is applied gently in the direction of lymph flow in order to unblock any obstructed lymph vessels, and allow lymph flow to transport waste from the body freely.

MLD massage is performed by a certified MLD massage therapist, who applies a light form of circular massage to their clients skin. MLD massages must be applied to bare skin, and no massage oils or lotions can be used in order for the treatment to be effective. MLD massage is applied in gentle strokes towards the heart. This technique will lightly stretch the walls of the lymph vessels and encourage lymph drainage.
